Mr. Sebastian Rucci  
Imperial Valley Computer Manufacturing, LLC  
16400 Pacific Coast Highway, #212  
Huntington Beach, CA 92649

**Phase I Environmental Site Assessment Report**  
**Vacant Parcels (Site #2)**  
**APNs 044-220-007, -044, -045, and -046**  
**287 W. Aten Road**  
**Imperial, California**  
***GSL Report No. S2508***

Dear Mr. Rucci:

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM E1527-21 of the four (4) parcels (APN 044-220-007, -044, -045, and -046) totaling approximately 70-acres located at 287 W. Aten Road in southeastern Imperial, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This assessment has revealed the following recognized environmental conditions (REC's) in connection with the property:

1. Parcel APN 044-220-045 has a Land Use Restriction due to contaminated soils due to a copper wire plating operation and aerospace components that previously existed on the subject property. A Final Remedial Action was performed in 1994 that involved construction of a soil/flexible membrane layer composite layer over the east evaporation pond; and excavation and disposal of approximately 8.8 tons of contaminated soil to a Class I landfill.

This assessment has revealed the following "de minimis" conditions or environmental concerns in connection with the property:

1. Pesticide residues (low concentrations) typical to agricultural crop applications may be present in the near surface soils.
2. Pole-mounted sealed electrical transformers owned and maintained by the Imperial Irrigation District (IID) exist on this subject property. All IID transformers containing PCB's have been replaced. The IID should be notified if leakage is noted and the transformers replaced.
3. Lead paint residues may be present in surface soils adjacent to the removed industrial building and the existing single-family residence.
4. Asbestos containing materials may also be present in the single-family residence.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312 and we have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Attached is our report which describes the procedures used and results of the assessment. If you have any questions or require additional information, please do not hesitate to contact the undersigned at (760) 337-1100. We appreciate the opportunity to provide our professional review for this subject property.

Respectfully Submitted,  
**GS Lyon Consultants, Inc.**

Jeffrey O. Lyon, PE  
Principal Engineer

Steven K. Williams, PG, CEG  
Consulting Geologist

## 1.0 INTRODUCTION

### 1.1 Purpose

GS Lyon Consultants, Inc. was retained by Imperial Valley Computer Manufacturing, LLC to conduct a Phase I Environmental Site Assessment (ESA) for the Property (herein referred to as the subject property in this Phase I ESA Report) as a prerequisite to property transaction (purchase, sale, refinance, etc.). The subject property is located at 287 W. Aten Road in southeastern Imperial, California. See Plate 1 in Appendix B for a Vicinity Map of the subject property.

The purpose of this Phase I Environmental Site Assessment (ESA) is to identify, to the extent feasible, recognized environmental conditions (RECs) associated with past and present activities on the subject property or in the immediate subject property vicinity in general conformance to ASTM Standard E1527-21 “*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*” that may affect future uses of the subject property.

This report is intended to satisfy the Phase I ESA portion of “*all appropriate inquiry*” into the previous ownership and uses of the subject property as defined under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) at Title 42 of the United States Code (U.S.C.) §9601(35)(B) and in accordance with 40 Code of Federal Regulations (CFR) Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule (AAI Rule).

### 1.2 Scope of Services

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-21. This assessment included:

- Reconnaissance of the subject property and adjacent properties
- Review user-provided information
- Interviews with persons with significant knowledge of the subject property
- Review of a regulatory database report provided by a third-party vendor
- Review readily-available historical sources (including but not limited to: aerial photographs, fire insurance maps, property tax files, recorded land title records, and topographical maps)
- Prepare report of findings

### 1.3 Authorization

Mr. Sebastian Rucci, Managing Member of Imperial Valley Computer Manufacturing, LLC, provided authorization by written agreement to proceed with our work on June 3, 2025. We conducted our work in general accordance with our written proposal dated December 26, 2024.

### 1.4 Limitations

No Phase I ESA can completely eliminate uncertainty regarding the potential for RECs in connection with a property. Conformance of this assessment with ASTM Standard E1527-21 is intended to reduce, but not eliminate uncertainty regarding the potential for RECs in connection with the Subject Property. While GS Lyon has made reasonable effort to discover and interpret available historical and current information on the property within the time available, the possibility of undiscovered contamination remains. Our assessment of the subject property and surrounding areas was conducted in accordance with ASTM guidelines and the *generally accepted environmental engineering standard of practice* which existed in Imperial County, California at the time that the report was prepared. No warranty, express or implied, is made.

GS Lyon Consultants, Inc. derived the data in this report primarily from visual inspections, examination of public records and information in the public domain, informal interviews with individuals, and readily available information about the subject property. The passage of time, manifestation of latent conditions or occurrence of future events may require further exploration of the subject property, analysis of the data, and reevaluation of the findings, observations, and conclusions expressed in this report.

The findings, observations, and conclusions expressed by GS Lyon Consultants in this report are not, and should not be considered, an opinion concerning the compliance of any past or present owner or operator of the subject property with any federal, state or local law or regulation.

This report should not be relied upon after **180 days** from the date of issuance, unless additional services are performed as defined in ASTM E1527-21 - Section 4.6.1.

### 1.5 Deviations or Data Gaps

ASTM Standard E1527-21 requires any significant data gaps, deviations, and deletions from the ASTM Standard to be identified and addressed in the Phase I ESA. A significant data gap would be one that affected the ability to identify a REC on the subject property or adjacent properties.

Through the course of this assessment, *data failures* or *data gaps* may have been encountered. These failures or gaps, if any, are discussed below. The following provides the opinion of the Environmental Professional as to the significance of the data gaps in terms of defining *recognized environmental conditions* at the subject property. Data failures may or may not be significant data gaps, and the discussion also provides information pertaining to whether the data failures resulted in significant data gaps.

### **1.5.1 Data Failures**

*Data failure* is a failure to achieve the historical (property use) research objectives specified in the ASTM Standard Practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

No *data failures* were encountered during this investigation.

### **1.5.2 Data Gaps**

A *data gap* is a lack of or inability to obtain information required by the ASTM Standard Practice, despite good faith efforts by the Environmental Professional (EP) to gather such information. This could include any component of the Practice, e.g., standard environmental records, interviews, or a complete reconnaissance. A data gap by itself is not inherently significant, but if other information and/or the EP's experience raises reasonable concerns about the gap, it may be judged to be significant.

Due to the location of the subject property, Sanborn Fire Insurance maps were not available for the subject property. Because there is no historical data or physical indications that the property has ever been developed or occupied by a business that would have produced hazardous materials, the lack of Sanborn Fire Insurance maps is not considered a significant data gap.

Aerial photographs and other historical records were not available at 5-year intervals as required under the ASTM E1527-21 standard. This resulted in a data gap for years that records were not available regarding the area of the subject property. However, based upon other historical information reviewed, the subject property has been predominantly agricultural use land except for the light industrial business in the west-central portion of the subject property between the 1970s to 1990s.. Therefore, this data gap is not considered to be significant.

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.

GS Lyon requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User.

### **1.6 Significant Assumptions**

In preparing this report, GS Lyon Consultants, Inc. has relied upon and presumed accurate certain information (or the absence thereof) about the subject property and adjacent properties by governmental officials and agencies, the Client, and others identified herein. Except as otherwise stated in the report, GS Lyon Consultants has not attempted to verify the accuracy or completeness of any such information.

### **1.7 User Reliance**

This report has been prepared on behalf of and for the exclusive use of Imperial Valley Computer Manufacturing, LLC for the particular subject property identified in this report and is subject to and issued in connection with the referenced Agreement and the provisions thereof. This report should not be relied upon by any party other than the client, its legal counsel, and financial institution without the express permission of GS Lyon Consultants, Inc. Any reliance on this report by other parties shall be at such party's sole risk. Any future consultation or provision of services to third parties related to the subject property requires written authorization from Imperial Valley Computer Manufacturing, LLC or their representatives. Any such services may be provided at GS Lyon Consultants sole discretion and under terms and conditions acceptable to GS Lyon Consultants, including potential additional compensation.

## 2.0 SITE DESCRIPTION

### 2.1 Site Location and Legal Description

The subject property is located at 287 W. Aten Road (APN 044-220-007, -044, -045, and -046) in southeastern Imperial, California. The subject property location is depicted on Plate 1, Site Map.

### 2.2 Current Property Use and Description

The subject property consists of four (4) parcels totaling approximately 70-acres and is currently predominantly fallow agricultural land except for the northwestern portion of the subject property (APN 044-220-045) is an industrial site with a large concrete pad and 4 pond areas. The subject property is roughly rectangular in plan view, elongated in the north-south direction. Leimgruber Road, an unpaved road, traverses the central portion of the subject property in a north-south direction.

### 2.3 Adjoining Property Use

The subject property is located within a mixed commercial, light industrial and residential area of southern Imperial, California. Adjacent properties consist of the abandoned Dune Company site west of the subject property across Clark Road, which forms the western boundary of the subject property. Golden Valley Applicators and the US Border Patrol training facility adjacent to the northwest portion of the subject property. The Central Drain, an earthen open agricultural run-off drainage ditch forms the southern property boundary. The US Border Patrol El Centro Headquarters and a single family residential subdivision are located adjacent to the east side of the subject property.

### 2.4 Physical Site Characteristics

Topography: Topographic maps (USGS 7.5 minute El Centro, CA Quadrangle) indicate that the subject property elevation is approximately 55 feet below mean sea level (MSL) or Elevation 945 (local datum). The Imperial Irrigation District, which supplies power and raw (irrigation) water to the area, established local datum by equating mean sea level to El. 1000.00 feet. The topography of the Imperial Valley is relatively flat, with few significant land features. The valley floor slopes gently to the north (less than 0.5 percent) from an elevation of sea level at Calexico to approximately 225 feet below sea level at the Salton Sea.

Geologic Setting: The subject property is located in the Colorado Desert Physiographic province of southern California. The dominant feature of the Colorado Desert province is the Salton Trough, a geologic structural depression resulting from large-scale regional faulting. The trough is bounded on the northeast by the San Andreas Fault and the southwest by faults of the San Jacinto Fault Zone.

The Salton Trough represents northward extension of the Gulf of California, which has experienced continual in-filling with both marine and non-marine sediments since the Miocene Epoch (25 million years before present). The tectonic activity that formed the trough continues at a high rate as evidenced by deformed young sedimentary deposits and high levels of historic seismicity.

The subject property is directly underlain by Holocene (0-11,000 years before present) Cahuilla Lake sediments, which consist of interbedded lenticular and tabular sand, silt, and clay. The predominant surface soil is silty clay. The Holocene lake deposits are considered to be less than 100 feet thick and are characterized by surficial clay and silt deposits with varying amounts of fine sand.

Soil Conditions: The USDA Natural Resources Conservation Service “Web Soil Survey” website indicates that surficial deposits at the project site consist predominantly of silty clay loams of the Imperial soil group (see Plate A-3). These loams are formed in sediment and alluvium of mixed origin (Colorado River overflows and fresh-water lake-bed sediments).

Based on Unified Soil Classification System presented in the Soils Survey Report, the permeability of these soils is expected to be low to very low.

Groundwater Conditions: The groundwater in the vicinity of the subject property is brackish and is typically encountered at a depth of 8 to 12 feet below the ground surface. Depth to groundwater may fluctuate due to localized geologic conditions, precipitation, irrigation, drainage and construction practices in the region. Based on the regional topography, groundwater flow is assumed to be generally towards the north within the subject property area. Flow directions may also vary locally in the vicinity of the subject property.

### 3.0 USER PROVIDED INFORMATION

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiry* is not complete. The user was asked to provide information or knowledge of the following:

- Environmental cleanup liens that are filed or recorded against the subject property.
- Activity and land use limitations that are in place on the subject property or that have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the LLPs.
- Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
- Commonly known or *reasonably ascertainable* information about the *property*.
- The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.
- The reason for preparation of this Phase I ESA.

A user questionnaire was provided to the user to aid in gathering information that may be pertinent to the evaluation of the subject property for environmental conditions. The completed user questionnaire is provided in Appendix I.

#### 3.1 Title Records

GS Lyon reviewed a preliminary title report provided by the User as part of this assessment and did not find easements that would indicate environmentally hazardous uses on the parcel.

#### 3.2 Environmental Liens or Activity and Use Limitations

An environmental lien is a charge, security, or encumbrance upon the title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon the property. According to the Environmental Questionnaire, Mr. Max Leimgruber (representative of Hermengilda Leimgruber, property owner) is not aware of the Environmental Liens or Activity and Use Limitations associated with the subject property that have been filed or recorded under federal, tribal, state or local law (Appendix I).

GS Lyon Consultants contracted Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut to conduct a search of environmental liens for the subject property. According to the EDR environmental lien report, there are no environmental liens associated with the subject property. The EDR environmental lien report is included in Appendix I.

**3.3 Specialized Knowledge**

According to the Environmental Questionnaire, Mr. Leimgruber is not aware of any specialized knowledge or experience associated with the subject property or nearby properties.

**3.4 Commonly Known or Reasonable Ascertainable Information**

No information was provided by the User regarding any commonly known or reasonably ascertainable information within the local community that is material to RECs in connection with the subject property.

**3.5 Valuation Reduction for Environmental Issues**

The User indicated that the purchase price of this property reasonably reflects the fair market value of the property with no discounts for environmental issues or that the valuation of the subject property is significantly less than the valuation for comparable properties due to environmental factors.

**3.6 Owner, Property Manager, and Occupant Information**

The current owners of the subject property are:

APN 044-220-007 – Jesus Barriga

APNs 044-220-044 and 044-220-045 – Daryl Dickerson, James Sanders, and Ryan Dickerson

APN 044-220-046 – Hermenegilda Leimgruber

The subject property is currently undeveloped vacant land. No property manager or occupant information is available.

**3.7 Previous Reports and Other Provided Documentation**

The client provided Natural Hazard Reports and Preliminary Title Reports for the subject property to GS Lyon for review during the course of this assessment.

## 4.0 RECORDS REVIEW

A review of historic aerial photographs (Appendix C), historic topographic maps (Appendix D), historic Sanborn Fire Insurance maps (Appendix E), governmental regulatory databases (Appendix F), other regulatory and agency databases (Appendix G), and historic telephone and city directories (Appendix H) was performed to evaluate potentially adverse environmental conditions resulting from previous ownership and uses of the subject property. The details of the review are presented in Sections 4.1 through 4.5 of this report.

### 4.1 Regulatory Database Review

#### 4.1.1 Standard Environmental Record Sources

GS Lyon Consultants contracted Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut which queries and maintains comprehensive environmental databases and historical information, including proprietary databases, aerial photography, topographic maps, Sanborn Maps, and city directories to generate a compilation of Federal, State and Tribal regulatory lists containing information regarding hazardous materials occurrences on or within the prescribed radii of ASTM E1527-21. The search of each database was conducted using the approximate minimum search distances from the subject property defined by the ASTM E1527-21 Standard. The purpose of the records review is to obtain and review *reasonably ascertainable* records that will help identify *recognized environmental conditions* or *historical recognized environmental conditions* in connection with the subject property.

EDR's Phase I ESA search package was ordered and performed on June 4, 2025. The search package included: Radius Map with Geocheck, aerial photographs, historic topographic maps, Sanborn maps, building permits, city directory, and property tax information.

The results of EDR's search were used to evaluate if the subject property and/or properties within prescribed search distances are listed as having a past or present record of actual or potential environmental impact. Inclusion of a property in a government database list does not necessarily indicate that the property has an environmental problem.

The following is a brief synopsis of sites identified in the EDR Radius Map report and does not list all of the potential risk sites detailed in the EDR Radius Map report. For a full listing of the complete government record search report, the EDR report is included in its entirety in Appendix F.

**Federal NPL List**

The Environmental Protection Agency's (EPA) National Priorities List (NPL) of uncontrolled or abandoned hazardous waste sites was reviewed for risk sites within a 1 mile radius of the subject property. The NPL identifies sites for priority cleanup and long-term care of properties under the Superfund Program that are contaminated with hazardous substances.

The database search did not identify any NPL sites within 1 mile of the subject property.

**Federal CERCLA List**

The EPA's Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLA) listings were reviewed to determine if risks sites within ½ mile are listed for investigation. The CERCLA database identifies hazardous waste sites that are on or proposed to be included in the NPL and sites that require investigation and possible remedial action to mitigate potential negative impacts on human health or the environment.

The CERCLA database search did not identify any risk sites within ½ mile of the subject property.

**Federal CERCLA – No Further Remedial Action Planned**

The EPA's CERCLA – No Further Remedial Action Planned (NFRAP) database was reviewed to determine if risks sites within ½ mile are listed. CERCLA NFRAP site are risk sites that have been removed from and archived from the inventory of CERCLA sites. Archived status indicates that, to the best of EPA's knowledge, assessment at the subject property has been completed and the EPA has determined that no further steps will be taken to list this subject property on the NPL, unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

This designation is for sites where no contamination was found, contamination was quickly removed without the need for the subject property to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

One CERCLA-NFRAP site is listed within ½-mile of the subject property. The Ramson Enterprises risk site is located at 291 W. Aten Road, adjacent to the northwest corner of the subject property. This risk site had 55-gallon drums containing various pesticides and chemicals stored on the exposed ground and may have spilled contents onto the soil. No testing was conducted in 1988 at the time of the NFRAP determination.

**Federal RCRA List**

The Federal Resource Conservation Recovery Act (RCRA) Notifiers List was reviewed to determine if RCRA treatment, storage or disposal sites (TSD) are located within 1 mile of the subject property. The RCRA Correction Action Sites List (CORRACTS) is maintained for risk sites which are undergoing “a corrective action”. A corrective action order is issued when there has been a release of hazardous waste constituents into the environment from a RCRA facility.

The RCRA and RCRA CORRACTS database searches did not identify any RCRA TSD or RCRA CORRACTS risk sites within ½ mile of the subject property.

The RCRA regulated hazardous waste generator notifiers list was reviewed to determine if RCRA generator facilities are located on or adjoining the subject property. Six (6) RCRA generator facilities within ¼ mile of the subject property were identified in the database.

1. Imperial Premix located at 330 W. Aten Road, approximately 1,000 west-northwest of the subject property.
2. Agriform located at 2375 Clark Road, approximately 350 feet west of the subject property.

**Federal ERNS List**

The Federal Emergency Response Notification System (ERNS) List was reviewed to determine if reported release of oil and/or hazardous substances occurred on the subject property.

The ERNS database searches did not identify any reported releases for the subject property.

**State and Tribal NPL List**

The Environmental Protection Agency’s (EPA) National Priorities List (NPL) of uncontrolled or abandoned hazardous waste sites was reviewed for risk sites within a 1 mile radius of the subject property. The NPL identifies sites for priority cleanup and long-term care of properties under the Superfund Program that are contaminated with hazardous substances.

The database search did not identify any NPL sites within 1 mile of the subject property.

**State and Tribal equivalent CERCLA**

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

The EnviroStor database search identified five (5) risk sites within 1 mile of the subject property.

1. Santa Fe Pacific Pipeline, LP (Imperial Terminal) located at 345 Aten Road, approximately 1,050 west of the subject property.
2. Imperial Premix located at 330 W. Aten Road, approximately 1,000 west-northwest of the subject property.
3. Ramson Enterprises risk site is located at 291 W. Aten Road, adjacent to the northwest corner of the subject property.
4. New School Site (Cross Elementary) is located at 2462 Cross Road, approximately 2,600 feet northeast of the subject property.
5. Ross Flying Service located at 1095 Airport Road, approximately 6,600 feet northwest of the subject property.

Because of the distance to these risk sites, other than the Ramson Enterprises site, the environmental risk to the subject property is very low.

**State and Tribal Leaking Underground Storage Tank Sites**

The California State Water Resources Control Board (SWRCB) maintains a list of information concerning reported leaking underground storage tanks (LUST). The LUST inventory list was reviewed to determine if any LUSTs are located within ½ mile the subject property.

The SWRCB LUST database identified one (1) separate LUST risk site within ½ mile of the subject property.

1. Contractors Equipment/Sunbelt Rentals located at 2396 Hwy 86, adjacent to the northwest portion of the subject property is listed as a LUST site. This risk site has been reviewed by the governing agency and the case closed.

#### **State and Tribal Underground and Aboveground Storage Tank Sites**

The California State Water Resource Control Board (SWRCB) underground storage tank (UST) and above ground storage tank (AST) inventory list was reviewed to determine if any USTs or ASTs are located on or adjacent to the subject property.

One (1) AST site was identified within ¼ mile of the subject property.

1. El Centro Border Patrol Station located at 221 W. Aten Road, adjacent to the northeast portion of the subject property, is listed as having aboveground storage tanks.

#### **Solid Waste Disposal/Landfill Facilities**

The Solid Waste Disposal/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data comes from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list database did not identify any risk sites within ½ mile of the subject property.

#### **Unmapped (Orphan) Sites**

Not all sites or facilities identified in the database records can be accurately located in relation to the Subject Property due to incomplete information being supplied to the regulatory agencies and are referred to as "orphan sites" by EDR. No unmapped (orphan) listings were reported.

The "Orphan Summary" section of the EDR Radius Map Report identified two (2) orphan sites. Based on a drive-by reconnaissance of the Subject Property vicinity and review of location and status information provided in the database report, none of the identified orphan sites are located within the search radii for databases specified by the Standard.

**Additional Government Environmental Records**

The subject property is not listed in several other government environmental record databases. The databases include:

**CERS Hazardous Waste:** List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

**HWTS:** Hazardous Waste Tracking System. DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

**HAZNET:** Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and, therefore, many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

**FINDS:** Facility Index System/Facility Registry System Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

**HAULERS:** A listing of registered waste tire haulers.

**ECHO:** Enforcement & Compliance History Information. ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

**RCRC NonGen/NLR:** RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

#### **4.1.2 Additional Government Records Review**

California Department of Toxic Substances Control (DTSC) Records – Envirostor Database: EnviroStor is an online search and Geographic Information System tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. Public Access to EnviroStor is accessible via the DTSC Web Page located at: <http://www.envirostor.dtsc.ca.gov/public/>. The EnviroStor database includes the following site types: Federal Superfund sites (National Priority List); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The information includes site name, site type, status, address, any restricted use (recorded deed restrictions), past use(s) that caused contamination, potential contaminants of concern, potential environmental media affected, site history, planned and completed activities. The EnviroStor database also contains current and historical information relating to Permitted and Corrective Action facilities. The EnviroStor database includes current and historical information on the following permit-related documents: facility permits; permit renewal applications; permit modifications to an existing permit; closure of hazardous waste management units (HWMUs) or entire facilities; facility corrective action (investigation and/or cleanup); and/or post-closure permits or other required post-closure activities.

The EnviroStor database was queried on June 4, 2025. A map showing the results of the query is provided in Appendix G. One (1) reported case was found on the subject property. The following cases were found within ½ mile of the subject property:

1. Caspian, Inc. located at 287 W. Aten Road, the subject property. From approximately 1973 to 1977, this Site was used for a copper-coated steel wire production facility which involved chemical processes that used chemical solutions such as sulfuric acid, hydrofluoric acid, calcium hydroxide and borax. In 1979, Caspian, Inc. (successor in interest to Taravat Inc.) purchased the Site for the manufacture of aerospace component parts. Caspian, Inc. used a chemical process that involved controlled dissolution of metal in a solution of hydrochloric, nitric, and hydrofluoric acid, after which the metal was removed and rinsed with water.

Caspian ceased milling operations at the Site in 1984. In 1986, Caspian removed contaminated concrete pads and soils under the oversight of the Regional Water Quality Control Board. Subsequent testing results indicated a need for further site remediation. In 1989, the Department of Toxic Substances Control (DTSC) issued a Consent Order to complete the Remedial Investigation (RI) and eventual remediation of the site. Subsequently, a Risk Assessment and a RI were conducted and completed. In December 1993, DTSC approved a Feasibility Study Report which identified, evaluated and screened Site clean-up alternatives. A Remedial Action Plan (RAP) which identified the selected clean-up alternatives was public noticed and a public meeting was held. DTSC approved the RAP on December 29, 1993.

The Final Remedial Action was performed April 19 through June 2, 1994, in accordance with the approved Remedial Action Workplan. The remediation involved construction of a soil/flexible membrane layer composite layer over the east evaporation pond; and excavation and disposal of approximately 8.8 tons of contaminated soil to a Class I landfill. The Site was certified on June 30, 1994, with a Land Use Covenant requiring further monitoring of the East Pond Cap. A copy of the Land Use Covenant for this property is provided in Appendix G. The site is inspected annually, and three Five Year Reviews have been conducted. The next Five-Year Review is scheduled for 2026. This area of the subject property is under the Dickerson/Sanders ownership.

2. Imperial Premix located at 330 W. Aten Road, approximately 1,000 feet west-northwest of the subject property is listed in the EnviroStor database. This risk site entered an agreement with DTSC to storage of waste metal products.
3. Ramson Enterprises risk site is located at 291 W. Aten Road, adjacent to the northwest portion of the subject property. This risk site had 55-gallon drums containing various pesticides and chemicals stored on the exposed ground and may have spilled contents onto the soil. No testing was conducted in 1988.

California State Water Resources Control Board Records – GeoTracker Database: GeoTracker is a geographic information system (GIS) maintained by the California State Water Resources Control Board (SWRCB) that provides online access to environmental data at <http://www.geotracker.swrcb.ca.gov>. GeoTracker tracks regulatory data about underground fuel tanks, fuel pipelines, and public drinking water supplies. Site information from the Spills, Leaks, Investigations, and Cleanups (SLIC) Program is also included in GeoTracker.

The GeoTracker database was queried for environmental data pertaining to the subject property on June 4, 2025. A map showing the results of the query is provided in Appendix G. No reported cases were found on the subject property. The following case was found within ½ mile of the subject property:

1. Kinder-Morgan Imperial Terminal located at 345 W. Aten Road, adjacent to the east side of the subject property is listed in the Geotracker database. According to the Geotracker database, this site is an active fuel loading, storage, and transportation facility. It encompasses approximately 30 acres with 27 above ground storage tanks containing gasoline and diesel fuels. Soil and groundwater have been impacted with petroleum hydrocarbons. Groundwater monitoring and remedial activities are currently ongoing. Review of Geotracker documentation indicates that the contamination plumes are relatively localized to the spill location and project to the northeast. No plumes were noted extending onto the subject property.

California Environmental Protection Agency (CalEPA) Records Search: CalEPA Regulated Site Portal is a website that combines data about environmentally regulated sites and facilities in California into a single, searchable database and interactive map. The portal was created to provide a more holistic view of regulated activities statewide. By combining data from a variety of state and federal databases, the portal provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials.

The portal combines information from the following databases: Cal/OSHA, California Environmental Reporting System (CERS), California Integrated Water Quality System (CIWQS), US EPA's Air Emission Inventory System (EIS), Envirostor, Geotracker, Stormwater Multiple Application and Report Tracking System (SMARTS), Solid Waste Information System (SWIS), and Toxics Release Inventory (TRI).

The CalEPA database was queried for environmental data pertaining to the subject property on June 4, 2025. A map showing the results of the query and the CalEPA information for identified risk sites are provided in Appendix G. No reported cases were found on the subject property. The CalEPA database search identified eighteen (18) risk sites near the subject property.

CUPA Records Search: The Unified Program consolidates, coordinates, and makes consistent the administrative requirements, permits, inspections, and enforcement activities of six environmental and emergency response programs.

Cal/EPA and other state agencies set the standards for their programs while local governments implement the standards—these local implementing agencies are called Certified Unified Program Agencies (CUPA).

The DTSC Imperial CUPA office was contacted (Veronica Lopez) by email on June 30, 2025. CUPA records were searched for environmental issues related to the subject property. The DTSC indicated that no records were found associated with the subject property.

California Oil and Gas Well Sites: The California Department of Conservation Geologic Energy Management Division (CalGEM, formerly DOGGR) was created to serve the needs of the state, local governments, and industry by regulating statewide oil and gas activities with uniform laws and regulations. The CalGEM supervises the drilling, operation, maintenance, and plugging and abandonment of onshore and offshore oil, gas, and geothermal wells, preventing damage to: (1) life, health, property, and natural resources; (2) underground and surface waters suitable for irrigation or domestic use; and (3) oil, gas and geothermal reservoirs.

The CalGEM database was queried for environmental data pertaining to the subject property on June 4, 2025. A map showing the results of the query is provided in Appendix G. No operating or abandoned oil or gas wells were identified on or adjacent to the subject property.

#### **4.2 Historical Use Records**

ASTM E1527-21 requires the environmental professional to identify all obvious uses of the property from the present back to the property's first developed use or 1940, whichever is earliest. This information is collected to identify the likelihood that past uses have led to RECs in connection with the property. This task is accomplished by reviewing standard historical sources to the extent that they are necessary, reasonably ascertainable, and likely to be useful. These standard records include aerial photographs, fire insurance maps, property tax files, land title records, topographic maps, city directories, telephone directories, building department records, and zoning/land use records.

The general type of historical use (i.e., commercial, retail, residential, industrial, undeveloped, office) should be identified at 5-year intervals, unless the specific use of the property appears to be unchanged over a period longer than 5 years. The historical research is complete when the use is defined or when data failure occurs. Data failure occurs when all of the standard historical sources have been reviewed, yet the property use cannot be identified back to its first developed use or to 1940.

Data failure is not uncommon in trying to identify the use of the property at 5-year intervals back to first use or 1940, whichever is earlier.

GS Lyon reviewed the following historical records to identify obvious uses of the subject property from the present back to the property's first developed use, or to 1940, whichever is earlier. The results of this research and data failure, if encountered, are presented in the following sections.

#### **4.2.1 Title Records**

GS Lyon reviewed a preliminary title report provided by the User as part of this assessment and did not find any easements that would indicate environmentally hazardous uses on the parcels that did not include the copper wire/aerospace components plating operations. No title report was provided for the parcel with the Activity Use Limitation.

#### **4.2.2 Sanborn Fire Insurance Maps**

Sanborn Fire Insurance Maps are large scale maps depicting the commercial, industrial, and residential sections of various cities across the United States. Since the primary use of the fire insurance maps was to assess the buildings that were being insured, the existence and location of fuel storage tanks, flammable or other potentially toxic substances, and the nature of businesses are often shown on these maps.

Due to the undeveloped nature of the subject property and vicinity for the years the Sanborn Fire Insurance Maps were available for this subject property, no maps are available for the subject property. An "Unmapped Property" letter for the Sanborn Fire Insurance Maps is included in Appendix E.

#### **4.2.3 Aerial Photographs**

Aerial photographs obtained from Environmental Data Resources (EDR) dating back to 1937, the Imperial Irrigation District (IID) archives dating back to 1949, and Google Earth aerial photographs dating back to 1996 were reviewed for historical development of the subject property. Reproductions of the historical aerial photographs reviewed are included in Appendix C.

The 1937 aerial photograph shows the subject property as being divided into three (3) agricultural fields. The fields appear to be fallow. Adjacent properties consist of vacant land and agricultural fields. The Southern Pacific Railroad (currently Union Pacific) tracks are present adjacent to the southwest corner of the subject property. There is some type of development adjacent to the northwest corner of the subject property.

The 1949 and 1953 aerial photographs are similar to the 1937 photograph. The rural residence appears in the southwest corner of the subject property in the 1949 photograph.

The 1965 aerial photograph shows the subject property as being similar to the 1953 photograph. The Kinder-Morgan bulk petroleum facility and the Dune Company fertilizer facility are visible to the west across Clark Road.

The 1976 aerial photograph shows the subject property as being similar to the 1965 photograph except for the development of the Caspian facility on the west-central portion of the subject property (APN 044-220-045). The Caspian facility appears to show two elongate ponds on the west side of the parcel and the warehouse building in the northeast corner of the parcel. The small water storage basin is visible in the northwest corner of the parcel. A commercial building has been constructed adjacent to the northwest portion of the subject property.

The 1984 and 1992 aerial photographs show the subject property as being similar to the 1976 photograph. A third basin is visible east of the two elongated basins noted in the 1976 photograph.

The 1996, 2002, 2006, and 2010 aerial photographs show the subject property as being similar to the 1992 photograph. The eastern basin has been covered by the 1996 photograph. The US Border Patrol is under construction in the 2002 photograph. The Victoria Ranch residential subdivision was constructed between 2002 and 2006 adjacent to the southeast portion of the subject property.

The 2014, 2018, and 2022 aerial photographs show the subject property and adjacent properties as being similar to the present time. The large industrial building was removed by 2014.

#### **4.2.4 Street Directories**

GS Lyon Consultants contracted Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut to conduct a search of historic city directories for the subject property (Appendix H). City directories are used for locating individuals and businesses in a particular urban or suburban area. City directories are generally divided into three sections: a business index, a list of resident names and addresses, the name and type of businesses (if unclear from the name). While city directory coverage is comprehensive for major cities, it may be spotty for rural and small towns.

Polk City Directories: The Polk City Directories for the years 1959, 1963, 1967, 1972, 1977, 1982, and 1987 were reviewed. No listings for the subject property were found.

Cole Information and EDR Digital Archives: The Cole Information and EDR Digital Archives City Directories for the years 1992, 1995, 2000, 2005, 2010, 2014, 2017 and 2020 were reviewed. No listings for the subject property were found.

The 2000 directory lists Good New Mission at 291 W. Aten Road, adjacent to the northwest corner of the subject property.

The 2020 directory lists Cahi International, Inc at 291 W. Aten Road, adjacent to the northwest corner of the subject property.

#### **4.2.5 Historic Topographic Maps**

Historic topographic maps including the 1940 and 1948 Brawley 15-Min Quadrangle, and the 1957, 1979, 2012, 2015, 2018 and 2022, 7.5 Min. El Centro, CA Quadrangle, showed the subject property as predominantly vacant (Appendix D).

The 1940 and 1948 maps show a small structure in the southwest corner of the subject property corresponding to the rural residence.

The 1957 map shows a small structure in the southwest corner of the subject property corresponding to the rural residence.

The 1979 map shows the large industrial building in the central portion of the subject property along with the rural residence in the southwest corner of the subject property.

#### **4.2.6 Historical Telephone Directories**

Telephone Directories: Telephone directories for the Imperial County, which included the City of Imperial businesses published in 1941 and 1955 were reviewed. No service stations, chemical manufacturers, petroleum manufacturers, distributors, or automotive repair facilities were noted on the subject property.

### **4.3 Historical Use Summary**

#### **4.3.1 Summary of the Historical Use of Property**

Based on a review of historical information, the subject property has been predominantly fallow agricultural land since at least the 1930s. A rural residence has existed in the southwest corner of the subject site since the 1940s.

An industrial facility (Caspian) was developed on the west-central portion of the subject property in the 1970s until about 1990s.

**4.3.2 Summary of the Historical Use of Adjacent Properties**

Historically, the properties located immediately adjacent to the subject property have been comprised of agricultural land. Development in the general area, which began in the 1970s and became more extensive in the 1990s, has primarily been commercial and light industrial businesses to the west and northwest. Residential development occurred adjacent to the east side of the subject property in the 2000s.

## 5.0 SITE RECONNAISSANCE

### 5.1 Methodology and Limiting Conditions

A site reconnaissance was performed by Mr. Steven Williams, a consulting geologist to GS Lyon Consultants, on June 13, 2025. The site visit consisted of driving the perimeter of the subject property and randomly crossing the subject property. The reconnaissance included visual observations of surficial conditions at the subject property and observation of adjoining properties to the extent that they were visible from public areas. Mr. Williams was unaccompanied during the site reconnaissance.

The site reconnaissance was limited to visual and/or physical observation of the exterior and interior of the subject property and its improvements, the current uses of the property and adjoining properties, and the current condition of the property. The site visit evaluated the subject property and adjoining properties for potential hazardous materials/waste and petroleum product use, storage, disposal, or accidental release, including the following: presence of tank and drum storage; mechanical or electrical equipment likely to contain liquids; evidence of soil or pavement staining or stressed vegetation; ponds, pits, lagoons, or sumps; suspicious odors; fill and depressions; or any other condition indicative of potential contamination. The site visit did not evaluate the presence of asbestos-containing materials, radon, lead-based paint, mold, indoor air quality, or structural defects, or other non-scope items.

A site reconnaissance can be limited by weather conditions, bodies of water, adjacent buildings, or other obstacles. The weather was hot and sunny and no access limitations were placed on the site visit.

### 5.2 General Site Setting

The subject property is located at the southeast corner of Clark Road and Aten Road in southeastern Imperial, California. The subject property is roughly rectangular in plan view, elongate in the north-south direction. Leimgruber Road, an unpaved road, traverses the central portion of the subject property in a north-south direction.

A graded pile of undocumented fill soil was noted in the eastern portion of the northwestern parcel (APN 044-220-044). The undocumented soil was derived from construction activities of nearby development construction (placed by Pyramid Construction).

The west-central parcel (APN 044-220-044) has a large concrete slab in the northeast corner (location of the former industrial building), a small concrete lined water storage pond in the northwest corner and two (2) earthen water storage ponds in the southwest corner. A former pond, currently covered with small cobbles and rocks for erosion protection is located in the south-central portion of this parcel.

A rural residential home is located in the southwest corner of the subject property. There are numerous vehicles and other material stored around the residence. A concrete sump was noted in the parcel between the rural residence and the Caspian site.

A high voltage power line runs along the southern margin of the subject property. Pole-mounted electrical transformers were noted in the southwest and northwest corners of the subject property. No observable leaks were noted at the time of the site visit.

Photographs of the subject property taken on June 13, 2025, during our site reconnaissance are included in Appendix A.

### **5.3 Adjacent Properties**

The subject property is located within a mixed commercial, industrial and residential area of southern Imperial, California. Adjacent properties consist of the abandoned Dune Company site west of the subject property across Clark Road, which forms the western boundary of the subject property, and Golden Valley Applicators and the US Border Patrol training facility adjacent to the northwest portion of the subject property. The Central Drain, an earthen open agricultural run-off drainage ditch, forms the southern property boundary. The US Border Patrol El Centro Headquarters and a single-family residential subdivision are located adjacent to the east side of the subject property.

### **5.4 Exterior and Interior Observations**

The following conditions were specifically assessed for their potential to indicate RECs and may include conditions inside or outside structures on the subject property.

#### **5.4.1 Hazardous Substances and Petroleum Products**

GS Lyon did not observe operations that use, treat, store, dispose of, or generate hazardous materials or petroleum products on the subject property.

#### **5.4.2 Storage Tanks**

Underground Storage Tanks (USTs) – No obvious visual evidence indicating the current presence of USTs (i.e. vent pipes, fill ports, etc.) was noted.

Aboveground Storage Tanks (ASTs) – No obvious visual evidence indicating the historical presence of ASTs (i.e. secondary containments, concrete saddles, etc.) was observed.

#### **5.4.3 Odors**

No obvious strong, pungent, or noxious odors were noted during the site reconnaissance.

#### **5.4.4 Pools of Liquid**

Pools of liquid were not observed during the site reconnaissance.

#### **5.4.5 Drums and Containers**

GS Lyon did not observe drums or storage containers on the subject property.

#### **5.4.6 Unidentified Substance Containers**

GS Lyon did not observe open or damaged containers containing unidentified substances at the subject property.

#### **5.4.7 Suspect Polychlorinated Biphenyl (PCB) Containing Equipment**

Pole-mounted sealed electrical transformers owned and maintained by the Imperial Irrigation District (IID) are located at the north side and southwest of the subject property. In recent years, the IID has replaced all transformers that contained PCB's. No leaks were noted during our site visit.

### **5.5 Interior Observations**

The subject property is predominantly vacant agricultural land except for the rural residential home located in the southwest corner of the subject property. Access to the residence was not provided at the time of our site reconnaissance, therefore, no interior observations were conducted. The large industrial building was removed prior to 2014.

### **5.6 Exterior Observations**

#### **5.6.1 Pits, Ponds, and Lagoons**

One small concrete lined pond and two unlined ponds were noted on the western side of APN 044-220-045.

#### **5.6.2 Stained Soils or Pavement**

No evidence of significantly stained soil or pavement was noted on the subject property other than naturally occurring alkali stained soils.

### **5.6.3 Stressed Vegetation**

No evidence of stressed vegetation attributed to potential contamination was noted on the subject property.

### **5.6.4 Solid Waste**

No dumpsters or solid waste containers exist on the subject property. There are debris piles located adjacent to the rural residence in the southwest corner of the subject property.

### **5.6.5 Wastewater**

Wastewater is not generated at the subject property other than at the rural residence where wastewater is likely disposed of in a septic tank and leach field system.

### **5.6.6 Wells**

No evidence of wells (dry wells, drinking water, observation wells, groundwater monitoring wells, irrigation wells, injection wells or abandoned wells) was noted on the subject property.

### **5.6.7 Septic Systems**

A septic tank and leach field likely exists at the rural residence on the subject property and may exist near the large industrial building site.

## **5.7 Non-Scope Issues**

ASTM guidelines identify non-scope issues, which are beyond the scope of a Phase I ESA as defined by ASTM. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment. Some of these non-scope issues include; asbestos-containing building materials, radon, lead-based paint, and wetlands.

### **5.7.1 Asbestos-Containing Building Materials**

There is a potential for asbestos containing materials (ACM) existing at the subject property due to the age of the rural residence.

### **5.7.2 Lead-Based Paint**

There is a potential for lead based paint residues existing at the subject property due to the age of the rural residence and in the topsoil at the large industrial building site.

### 5.7.3 Radon

The subject property is located in Zone 3 as shown on the EPA Map of Radon Zones indicating a predicted average indoor radon screening level of less than 2 pCi/L; therefore, no further action is required. Radon gas is not believed to be a potential hazard at the subject property.

### 5.7.4 Wetlands

No wetlands are located within one (1) mile of the subject property.

### 5.7.5 Agricultural Use

Based on our review of environmental records, historical documents, and subject property conditions, the property has been in agricultural use and/or vacant since the late 1940's. Residues of currently available pesticides and currently banned pesticides such as DDT/DDE may be present in near surface soils in limited concentrations. The concentrations of these pesticides found on other Imperial Valley agricultural sites are typically less than 25% of the current regulatory threshold limits and, at those levels, are not considered a significant environmental hazard. The presence and concentration of near surface pesticides at this subject property can be accurately characterized only by site-specific sampling and testing.

### 5.7.6 Substances Not Defined as Hazardous Substances

There are some substances that non-*environmental professionals* and others may assume to be *hazardous substances* that are not defined (or not yet defined) as *hazardous substances* under CERCLA through interpretation by EPA regulations and the courts. These substances may include: (1) some substances that occur naturally or through biological digestion (for example, methane), and (2) substances about which human understanding is evolving (for example, per- and polyfluoroalkyl substances, also known as “PFAS”). These and any other “emerging contaminants,” where they are not identified as a *hazardous substance* by CERCLA, as interpreted by EPA regulations and the courts, are considered non-scope issues.

Two (2) types of PFAS, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) have been designated as hazardous substance under CERCLA. PFAS can be present in our water, soil, air, and food as well as in materials found in our homes or workplaces, including:

- Drinking water
- Soil and water at or near waste sites
- Fire extinguishing foam
- Manufacturing or chemical production facilities that produce or use PFAS
- Food and Food packaging
- Household products and dust
- Personal care products
- Biosolids

Based on the historical uses of the subject property, the potential for PFAS residues existing at the subject property is low.

For agricultural properties, the most common source of PFAS would be through the application of biosolids as fertilizer to agricultural fields. Imperial County Agricultural Department does not allow the application of biosolids (human waste) to agricultural fields. No historical records were found to indicate application of biosolids occurred on the subject property; therefore, the potential for PFAS residues existing at the subject property is low.

## 6.0 INTERVIEWS

GS Lyon attempted to interview various individuals familiar with the subject property, as identified to us, and/or government officials in order to evaluate historical uses and identify potential RECs existing on the subject property. The individuals interviewed were asked to provide responses in good faith and to the best of their knowledge. The following sections identify the individuals interviewed and summarize the information each provided; however, additional information provided by these individuals may be presented in other sections of this report.

### 6.1 Interview with Owner

Mr. Ryan Dickerson, property owner, was interviewed by GS Lyon personnel on June 26, 2025. Mr. Dickerson indicated that there is a Land Use Covenant for the parcel (APN 044-220-044). Mr. Dickerson conducts annual visual inspections of the parcel in accordance with the Land Use Covenant. Mr. Dickerson also indicated that the undocumented fill located in parcel APN 044-220-044 was placed by Pyramid Construction and derived from excess soil from a construction project. Mr. Dickerson indicated that the soil does not contain known contaminants.

Mr. Max Leimgruber, representative for the Hermenegilda Leimgruber Trust, provided information through an Environmental Questionnaire concerning his knowledge of the subject property. Mr. Leimgruber indicated that he was unaware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Mr. Leimgruber is not aware of the Environmental Liens or Activity and Use Limitations associated with the industrial building located on subject property.

### 6.2 Interview with the Site Manager

The subject property is vacant, undeveloped land; therefore, there is no site manager.

### 6.3 Interview with Occupants

The subject property is vacant, undeveloped land; therefore, there are no occupants except for the rural residential home in the southwest corner of the subject property.

**6.4 Interview with Local Government Officials**

The DTSC Imperial CUPA office was contacted (Veronica Lopez) by email on June 30, 2025. CUPA records were searched for environmental issues related to the subject property. The DTSC indicated that no records were found associated with the subject property.

## 7.0 EVALUATION

### 7.1 Summary of Findings

The subject property is located in an area generally developed for commercial and light industrial use in southern Imperial, California. Based on a review of historical information, the subject property has been predominantly fallow agricultural land since at least the 1930s. A rural residence has existed in the southwest corner of the subject site since the 1940s. An industrial facility (Caspian) was developed on the west-central portion of the subject property in the 1970s until about 1990s.

### 7.2 Conclusions

GS Lyon has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM E1527-21 of the property located at 287 W. Aten Road in southeastern Imperial, California. Any exceptions to, or deviations from, this practice are described in Section 1.4 of this Phase I ESA report.

#### 7.2.1 Recognized Environmental Conditions

A *recognized environmental condition (REC)* refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

This Phase I ESA has revealed no evidence of *recognized environmental conditions* in connection with the subject property.

#### 7.2.2 Controlled Recognized Environmental Conditions

A *controlled recognized environmental condition (CREC)* refers to a *recognized environmental condition* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to implementation of required controls (for example, *activity and use limitations* or *other property use limitations*).

1. There is a Land Use Covenant (LUC) for a covered basin in the southwestern portion of parcel APN 044-220-045. DTSC has indicated that no further remediation is required for groundwater at this site, however, the LUC is still in effect for the soils within the basin and annual site inspections and 5-year review are required as part of the LUC.

### 7.2.3 Historical Recognized Environmental Conditions

A *historical recognized environmental condition (HREC)* refers to a previous *release of hazardous substances or petroleum products* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

This Phase I ESA has revealed no evidence of *HREC(s)* in connection with the subject property.

### 7.2.4 Environmental Concerns and De Minimis Conditions

A *de minimis condition* is a condition related to a *release* that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis condition* is not a *recognized environmental condition* nor a *controlled recognized environmental condition*.

This Phase I ESA has revealed the following *de minimis* conditions or environmental concerns in connection with the subject property:

1. Pesticide residues (low concentrations) typical to agricultural crop applications may be present in the near surface soils. Pesticide residues (low concentrations) typical to agricultural crop applications may be present in the near surface soils.
2. Pole-mounted sealed electrical transformers owned and maintained by the Imperial Irrigation District (IID) exist on this subject property. All IID transformers containing PCB's have been replaced. The IID should be notified if leakage is noted and the transformers replaced.
3. Lead paint residues may be present in surface soils adjacent to the removed industrial building and the existing single-family residence.
4. Asbestos containing materials may also be present in the single-family residence.

## 7.3 Recommendations

Based on the scope of work performed for this assessment, it is our professional opinion that no RECs have been identified in connection with the subject property that would warrant further environmental study (Phase II) at this time. Sampling/testing of near surface soils for lead-based paint residue near the single-family residence and industrial building should be performed prior to demolition/earthwork.

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

**Warning:** Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
 Web Soil Survey URL:  
 Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Imperial County, California, Imperial Valley Area  
 Survey Area Data: Version 17, Sep 10, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Mar 17, 2021—May 22, 2021

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
114	Imperial silty clay, wet	81.9	61.1%
115	Imperial-Glenbar silty clay loams complex, 0 to 2 percent slopes, wet	38.1	28.4%
122	Meloland very fine sandy loam, wet	14.1	10.5%
<b>Totals for Area of Interest</b>		<b>134.1</b>	<b>100.0%</b>

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GS Lyon Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Certification #** 72EF-4D65-B456

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

287 W. ATEN ROAD  
IMPERIAL, CA 92251

#### COORDINATES

Latitude (North): 32.8222490 - 32° 49' 20.09"  
Longitude (West): 115.5589000 - 115° 33' 32.04"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 634899.7  
UTM Y (Meters): 3632311.0  
Elevation: 51 ft. below sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Lists of Federal RCRA generators***

RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System  
US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

## EXECUTIVE SUMMARY

### ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE..... State Response Sites

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF..... Solid Waste Information System

### ***Lists of state and tribal leaking storage tanks***

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing

UST..... Active UST Facilities

INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

INDIAN VCP..... Voluntary Cleanup Priority Listing

VCP..... Voluntary Cleanup Program Properties

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT..... Waste Management Unit Database

SWRCY..... Recycler Database

HAULERS..... Registered Waste Tire Haulers Listing

INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands

DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations

ODI..... Open Dump Inventory

IHS OPEN DUMPS..... Open Dumps on Indian Land

### ***Local Lists of Hazardous waste / Contaminated Sites***

US HIST CDL..... Delisted National Clandestine Laboratory Register

HIST Cal-Sites..... Historical Calsites Database

CDL..... Clandestine Drug Labs

Toxic Pits..... Toxic Pits Cleanup Act Sites

US CDL..... National Clandestine Laboratory Register

### ***Local Lists of Registered Storage Tanks***

SWEEPS UST..... SWEEPS UST Listing

## EXECUTIVE SUMMARY

CA FID UST..... Facility Inventory Database

### **Local Land Records**

LIENS..... Environmental Liens Listing  
LIENS 2..... CERCLA Lien Information  
DEED..... Deed Restriction Listing

### **Records of Emergency Release Reports**

HMIRS..... Hazardous Materials Information Reporting System  
CHMIRS..... California Hazardous Material Incident Report System  
LDS..... Land Disposal Sites Listing  
MCS..... Military Cleanup Sites Listing  
SPILLS 90..... SPILLS 90 data from FirstSearch

### **Other Ascertainable Records**

FUDS..... Formerly Used Defense Sites  
DOD..... Department of Defense Sites  
SCRD DRYCLEANERS..... State Coalition for Remediation of Drycleaners Listing  
US FIN ASSUR..... Financial Assurance Information  
EPA WATCH LIST..... EPA WATCH LIST  
2020 COR ACTION..... 2020 Corrective Action Program List  
TSCA..... Toxic Substances Control Act  
TRIS..... Toxic Chemical Release Inventory System  
SSTS..... Section 7 Tracking Systems  
ROD..... Records Of Decision  
RMP..... Risk Management Plans  
RAATS..... RCRA Administrative Action Tracking System  
PRP..... Potentially Responsible Parties  
PADS..... PCB Activity Database System  
ICIS..... Integrated Compliance Information System  
FTTS..... FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)  
MLTS..... Material Licensing Tracking System  
COAL ASH DOE..... Steam-Electric Plant Operation Data  
COAL ASH EPA..... Coal Combustion Residues Surface Impoundments List  
PCB TRANSFORMER..... PCB Transformer Registration Database  
RADINFO..... Radiation Information Database  
HIST FTTS..... FIFRA/TSCA Tracking System Administrative Case Listing  
DOT OPS..... Incident and Accident Data  
CONSENT..... Superfund (CERCLA) Consent Decrees  
INDIAN RESERV..... Indian Reservations  
FUSRAP..... Formerly Utilized Sites Remedial Action Program  
UMTRA..... Uranium Mill Tailings Sites  
LEAD SMELTERS..... Lead Smelter Sites  
US AIRS..... Aerometric Information Retrieval System Facility Subsystem  
US MINES..... Mines Master Index File  
ABANDONED MINES..... Abandoned Mines  
MINES MRDS..... Mineral Resources Data System  
FINDS..... Facility Index System/Facility Registry System  
ECHO..... Enforcement & Compliance History Information  
DOCKET HWC..... Hazardous Waste Compliance Docket Listing  
UXO..... Unexploded Ordnance Sites

## EXECUTIVE SUMMARY

FUELS PROGRAM.....	EPA Fuels Program Registered Listing
PFAS NPL.....	Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES.....	Federal Sites PFAS Information
PFAS TRIS.....	List of PFAS Added to the TRI
PFAS TSCA.....	PFAS Manufacture and Imports Information
PFAS RCRA MANIFEST.....	PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR.....	PFAS Contamination Site Location Listing
PFAS WQP.....	Ambient Environmental Sampling for PFAS
PFAS NPDES.....	Clean Water Act Discharge Monitoring Information
PFAS PROJECT.....	NORTHEASTERN UNIVERSITY PFAS PROJECT
PFAS ECHO.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS ECHO FIRE TRAIN.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS PT 139 AIRPORT.....	All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC.....	Aqueous Foam Related Incidents Listing
BIOSOLIDS.....	ICIS-NPDES Biosolids Facility Data
UST FINDER.....	UST Finder Database
PFAS.....	PFAS Investigation Site Location Listing
AQUEOUS FOAM.....	Former Fire Training Facility Assessments Listing
CA BOND EXP. PLAN.....	Bond Expenditure Plan
CHROME PLATING.....	Chrome Plating Facilities Listing
DRYCLEANERS.....	Cleaner Facilities
EML.....	Emissions Inventory Data
ENF.....	Enforcement Action Listing
Financial Assurance.....	Financial Assurance Information Listing
ICE.....	Inspection, Compliance and Enforcement
HWP.....	EnviroStor Permitted Facilities Listing
HWT.....	Registered Hazardous Waste Transporter Database
HWTS.....	Hazardous Waste Tracking System
HAZNET.....	Facility and Manifest Data
MINES.....	Mines Site Location Listing
MWMP.....	Medical Waste Management Program Listing
NPDES.....	NPDES Permits Listing
PEST LIC.....	Pesticide Regulation Licenses Listing
PROC.....	Certified Processors Database
Notify 65.....	Proposition 65 Records
HAZMAT.....	Hazardous Material Facilities
UIC.....	UIC Listing
UIC GEO.....	UIC GEO (GEOTRACKER)
WASTEWATER PITS.....	Oil Wastewater Pits Listing
WDS.....	Waste Discharge System
WIP.....	Well Investigation Program Case List
MILITARY PRIV SITES.....	MILITARY PRIV SITES (GEOTRACKER)
PROJECT.....	PROJECT (GEOTRACKER)
WDR.....	Waste Discharge Requirements Listing
CIWQS.....	California Integrated Water Quality System
CERS.....	CERS
NON-CASE INFO.....	NON-CASE INFO (GEOTRACKER)
OTHER OIL GAS.....	OTHER OIL & GAS (GEOTRACKER)
PROD WATER PONDS.....	PROD WATER PONDS (GEOTRACKER)
SAMPLING POINT.....	SAMPLING POINT (GEOTRACKER)
WELL STIM PROJ.....	Well Stimulation Project (GEOTRACKER)

### **EDR HIGH RISK HISTORICAL RECORDS**

#### ***EDR Exclusive Records***

EDR MGP..... EDR Proprietary Manufactured Gas Plants

## EXECUTIVE SUMMARY

EDR Hist Auto..... EDR Exclusive Historical Auto Stations  
EDR Hist Cleaner..... EDR Exclusive Historical Cleaners

### EDR RECOVERED GOVERNMENT ARCHIVES

#### ***Exclusive Recovered Govt. Archives***

RGA LF..... Recovered Government Archive Solid Waste Facilities List  
RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Lists of Hazardous waste / Contaminated Sites***

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category, depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 01/21/2025 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CONTRACTORS EQUIPMEN	2396 HIGHWAY 86	WNW 1/4 - 1/2 (0.493 mi.)	F27	109

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as e-Manifest, will modernize the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 E MANIFEST sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 9 CUPA Listings sites within approximately 0.25 miles of the target property.

Violation Notes: generator knowledge or applying testing method.  
Returned to compliance on 09/11/2017. Facility is disposing of sump water from car wash as non-hazardous waste with no documentation to support this determination.

Violation Division: Imperial CUPA - DTSC  
Violation Program: HW  
Violation Source: CERS,

Site ID: 392079  
Site Name: El Centro Border Patrol Station  
Violation Date: 04-05-2017  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to have a licensed professional engineer properly review and certify the SPCC Plan.

Violation Notes: Returned to compliance on 09/11/2017. PE certification does not state that "procedures for required inspections and training have been conducted.

Violation Division: Imperial CUPA - DTSC  
Violation Program: APSA  
Violation Source: CERS,

Site ID: 392079  
Site Name: El Centro Border Patrol Station  
Violation Date: 04-05-2017  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.

Violation Notes: Returned to compliance on 09/11/2017. Inspections are not conducted or documented in accordance with SPCC plan. Monthly and quarterly inspections are being conducted by a contractor, but forms found in the SPCC plan are not being used. In addition, quarterly plans are not in the SPCC plan. Annual inspections are in the SPCC plan, but there is no documentation showing they have been conducted. Inspection records that are at the facility do not address what was inspected, just that an inspection was conducted. Fill ports for diesel fuel tanks 3 and 4 have approximately 1 quart to 1/2 gallon of diesel fuel in them.

Violation Date: 02-21-2017  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.

Violation Notes: Returned to compliance on 11/10/2021. OBSERVATION: Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years. Facility's plan states monthly inspections will be conducted and records have not been kept in accordance with the plan. CORRECTIVE ACTION: Conduct tests/inspections in accordance with written procedures and maintain records for 3 years.

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 03/23/2017. OBSERVATION: [One 55 gallon drum of waste antifreeze on site greater than 180 days]. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/27/2025	Source: EPA
Date Data Arrived at EDR: 04/01/2025	Telephone: N/A
Date Made Active in Reports: 04/24/2025	Last EDR Contact: 06/02/2025
Number of Days to Update: 23	Next Scheduled EDR Contact: 07/07/2025
	Data Release Frequency: Quarterly

EPA Region 10  
Telephone 206-553-8665

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/27/2025	Source: EPA
Date Data Arrived at EDR: 04/01/2025	Telephone: N/A
Date Made Active in Reports: 04/24/2025	Last EDR Contact: 06/02/2025
Number of Days to Update: 23	Next Scheduled EDR Contact: 07/07/2025
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/27/2025  
Date Data Arrived at EDR: 04/01/2025

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Telephone: 703-603-8704  
Last EDR Contact: 03/27/2025  
Next Scheduled EDR Contact: 07/07/2025  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/27/2025  
Date Data Arrived at EDR: 04/01/2025

Next Scheduled EDR Contact: 07/21/2025  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/27/2025	Source: EPA
Date Data Arrived at EDR: 04/01/2025	Telephone: 800-424-9346
Date Made Active in Reports: 04/24/2025	Last EDR Contact: 06/02/2025
Number of Days to Update: 23	Next Scheduled EDR Contact: 07/21/2025
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 02/17/2025	Source: EPA
Date Data Arrived at EDR: 02/19/2025	Telephone: 800-424-9346
Date Made Active in Reports: 03/06/2025	Last EDR Contact: 06/03/2025
Number of Days to Update: 15	Next Scheduled EDR Contact: 06/30/2025

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895
Date Made Active in Reports: 03/06/2025	Last EDR Contact: 03/18/2025
Number of Days to Update: 15	Next Scheduled EDR Contact: 06/30/2025
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895
Date Made Active in Reports: 03/06/2025	Last EDR Contact: 03/18/2025
Number of Days to Update: 15	Next Scheduled EDR Contact: 06/30/2025
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895
Date Made Active in Reports: 03/06/2025	Last EDR Contact: 03/18/2025
Number of Days to Update: 15	Next Scheduled EDR Contact: 06/30/2025
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895
Date Made Active in Reports: 03/06/2025	Last EDR Contact: 03/18/2025
Number of Days to Update: 15	Next Scheduled EDR Contact: 06/30/2025
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/11/2024	Source: Department of the Navy
Date Data Arrived at EDR: 11/25/2024	Telephone: 843-820-7326
Date Made Active in Reports: 02/18/2025	Last EDR Contact: 04/30/2025
Number of Days to Update: 85	Next Scheduled EDR Contact: 08/18/2025
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/29/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/18/2025	Telephone: 703-603-0695
Date Made Active in Reports: 04/29/2025	Last EDR Contact: 05/20/2025
Number of Days to Update: 70	Next Scheduled EDR Contact: 12/02/2024
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/29/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/18/2025	Telephone: 703-603-0695
Date Made Active in Reports: 04/29/2025	Last EDR Contact: 05/20/2025
Number of Days to Update: 70	Next Scheduled EDR Contact: 09/01/2025
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/03/2024

Source: National Response Center, United States Coast Guard

Date Data Arrived at EDR: 12/11/2024

Telephone: 202-267-2180

Date Made Active in Reports: 02/18/2025

Last EDR Contact: 03/18/2025

Number of Days to Update: 69

Next Scheduled EDR Contact: 06/30/2025

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/21/2025

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 01/22/2025

Telephone: 916-323-3400

Date Made Active in Reports: 04/03/2025

Last EDR Contact: 04/22/2025

Number of Days to Update: 71

Next Scheduled EDR Contact: 08/04/2025

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Lists of state and tribal voluntary cleanup sites***

### **INDIAN VCP R7: Voluntary Cleanup Priority Listing**

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008	Source: EPA, Region 7
Date Data Arrived at EDR: 04/22/2008	Telephone: 913-551-7365
Date Made Active in Reports: 05/19/2008	Last EDR Contact: 07/08/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: Varies

### **INDIAN VCP R1: Voluntary Cleanup Priority Listing**

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015	Source: EPA, Region 1
Date Data Arrived at EDR: 09/29/2015	Telephone: 617-918-1102
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 03/12/2025
Number of Days to Update: 142	Next Scheduled EDR Contact: 06/30/2025
	Data Release Frequency: Varies

### **VCP: Voluntary Cleanup Program Properties**

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 01/21/2025	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/22/2025	Telephone: 916-323-3400
Date Made Active in Reports: 04/03/2025	Last EDR Contact: 04/22/2025
Number of Days to Update: 71	Next Scheduled EDR Contact: 08/04/2025
	Data Release Frequency: Quarterly

## ***Lists of state and tribal brownfield sites***

### **BROWNFIELDS: Considered Brownfields Sites Listing**

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 03/17/2025	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/18/2025	Telephone: 916-323-7905
Date Made Active in Reports: 05/30/2025	Last EDR Contact: 03/18/2025
Number of Days to Update: 73	Next Scheduled EDR Contact: 06/30/2025
	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/09/2024	Source: Environmental Protection Agency

## Local Lists of Hazardous waste / Contaminated Sites

### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 12/31/2024	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 02/20/2025	Telephone: 202-307-1000
Date Made Active in Reports: 04/29/2025	Last EDR Contact: 06/02/2025
Number of Days to Update: 68	Next Scheduled EDR Contact: 09/01/2025
	Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 01/21/2025	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/22/2025	Telephone: 916-323-3400
Date Made Active in Reports: 04/03/2025	Last EDR Contact: 04/22/2025
Number of Days to Update: 71	Next Scheduled EDR Contact: 08/04/2025
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2022	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 03/21/2024	Telephone: 916-255-6504
Date Made Active in Reports: 06/12/2024	Last EDR Contact: 05/20/2025
Number of Days to Update: 83	Next Scheduled EDR Contact: 08/11/2025
	Data Release Frequency: Varies

### CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Data Release Frequency: No Update Planned

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/31/2024

	Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 02/24/2025	Source: DTSC and SWRCB
Date Data Arrived at EDR: 02/25/2025	Telephone: 916-323-3400

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

	Data Release Frequency: No Update Planned

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency

	Data Release Frequency: Annually

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 04/25/2025	Source: EPA
Date Data Arrived at EDR: 05/01/2025	Telephone: 703-416-0223
Date Made Active in Reports: 05/21/2025	Last EDR Contact: 06/02/2025
Number of Days to Update: 20	Next Scheduled EDR Contact: 09/08/2025
	Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Number of Days to Update: 80	Next Scheduled EDR Contact: 07/28/2025
	Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

Date of Government Version: 03/03/2025	Source: Environmental Protection Agency

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

Date of Government Version: 03/24/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/02/2025	Telephone: 202-272-0167

## PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

### UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

	Data Release Frequency: Varies

### UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

## CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HWTS: Hazardous Waste Tracking System

DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 07/19/2024	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 07/30/2024	Telephone: 916-324-2444
Date Made Active in Reports: 08/28/2024	Last EDR Contact: 03/31/2025
Number of Days to Update: 29	Next Scheduled EDR Contact: 07/14/2025
	Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

### SITE MIT SANTA CRUZ: Site Mitigation Santa Cruz County List

Sites may become contaminated with toxic chemicals through illegal dumping or disposal, from leaking underground storage tanks, or through industrial or commercial activities. The goal of the site mitigation program is to protect the public health and the environment while facilitating completion of contaminated site clean-up projects in a timely manner.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

IV DATA CENTER CAMPUS SITE #2  
287 W. ATEN ROAD  
IMPERIAL, CA 92251

### TARGET PROPERTY COORDINATES

Latitude (North):	32.822249 - 32° 49' 20.10"
Longitude (West):	115.5589 - 115° 33' 32.04"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	634899.7
UTM Y (Meters):	3632311.0
Elevation:	51 ft. below sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	50005757 EL CENTRO, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06025C1725C	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
Not Reported	

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
EL CENTRO	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Imperial

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	11 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

### Soil Map ID: 2

Soil Component Name: Imperial

Soil Surface Texture: silty clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.4
2	11 inches	25 inches	stratified loamy fine sand to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.4
3	25 inches	70 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.4

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### Geothermal Wells Listing

Department of Conservation

Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservation's Geologic Energy Management Division (CalGEM, formerly DOGGR).

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

# APPENDIX G

Project No.: GS2508

Envirostor Map

Plate 5

January 12, 1996

Mr. Haissam Salloum, PE  
Unit Chief, Site Mitigation Operations Branch  
Toxic Substances Control Division  
245 West Broadway, Suite 425  
Long Beach, California 90802

Subject: Results of Semi-Annual Groundwater Monitoring  
and Sampling, June-December 1995  
Caspian Facility, 2440 Leimgruber Road, El Centro, California  
GTI Project 023400162

Dear Mr. Salloum:

Groundwater Technology, Inc. personnel measured water levels and collected groundwater samples from 4 on-site monitoring wells and 1 off-site monitoring well at the referenced Caspian Facility on November 28, 1995. The samples were collected in accordance with the approved Remedial Action Plan Work Plan prepared for the site by Dudek & Associates, Inc. (Dudek), dated May 1994.

On November 28, 1995, the 5 monitoring wells were gauged, purged, and sampled. Groundwater monitoring data are presented in Table 1. Groundwater temperature, pH, and electrical conductivity were measured during purging to ensure that these parameters had stabilized prior to sample collection (Table 2). A duplicate sample was collected from well MW-1 and split-samples were collected from wells MW-1 and MW-3.

Groundwater samples were delivered to Analytical Technologies, Inc. in San Diego, California for analysis by EPA Methods 8240 (volatile organics), 6010 (selected metals), and 7421 (lead). Split-samples were submitted to BC Laboratories, Inc. in Bakersfield, California for the same analyses.

Groundwater elevations ranged from -64.41 feet mean sea level (msl) in well MW-3 to -64.58 feet msl in well MW-1 when measured on November 28, 1995 (Table 1, Figure 1). Groundwater elevations fell by an average of 0.67 feet compared to the June 1995 monitoring data; the November 1995 groundwater elevations are similar to data from December 1994. Water levels in the 5 monitoring wells indicate a very flat gradient of 0.0004 feet/foot to the north/northwest as of November 28, 1995. The gradient direction is consistent with that observed during the June 1995 and December 1994 monitoring and sampling episodes. The November 1995 groundwater gradient is shallower than the gradients reported the 2 previous monitoring events.

Results of laboratory analysis indicate that 1,1-dichloroethene (1,1-DCE), 1,1-dichloroethane (1,1-DCA) and tetrachloroethene (PCE) were detected in the groundwater sample from well MW-3 at concentrations of 3, 22, and 5 micrograms per liter ( $\mu\text{g/L}$ ), respectively (Table 3). The split-sample

taken from MW-3 yielded similar results for the above chlorinated compounds when analyzed at BC Laboratories. These concentrations are consistent with those detected in June 1995 and December 1994 (Table 3). Samples from all other wells, field and trip blanks, duplicate MW-1, and split-sample MW-1 did not contain volatile organic compounds above detection limits. Groundwater samples from all wells had metal concentrations below detection limits. Complete laboratory reports with chain-of-custody documentation are attached.

In summary, the results of the November 1995 semi-annual groundwater monitoring and sampling at the site are generally consistent with the results of the previous monitoring performed by Groundwater Technology and Dudek.

The wells at the Caspian facility have been monitored and sampled on a semi-annual basis since 1990 (5 years). Groundwater Technology recommends that the State consider discontinuing groundwater monitoring and close the site for the following reasons: 1) hydrocarbon concentrations in well W-3 have been consistently below 100  $\mu\text{g/L}$  and have generally declined since monitoring began, 2) the absence of hydrocarbons in the remaining wells indicates a minimal source area resulting in a limited or stable hydrocarbon plume in groundwater, and 3) beneficial uses for groundwater in this area are likely limited or non-existent due to a brackish groundwater aquifer confirmed by high electrical conductivity readings ( $>20,000 \mu\text{mhos/cm}$ ) taken during purging.

If you have any questions, please contact the undersigned at (619) 453-8415.

Sincerely,

**Groundwater Technology, Inc.**

This Land Use Covenant and Agreement ("Covenant") is made by and between Aten Properties, LLC (the "Covenantor"), the current owner of property located at 287 Aten Road, Imperial, in the County of Imperial, State of California (the "Property"), and the Department of Toxic Substances Control (the "Department"). Pursuant to Civil Code section 1471, the Department has determined that this Covenant is reasonably necessary to protect present or future human health or safety or the environment as a result of the presence on the land of hazardous materials as defined in Health and Safety Code section 25260. The Covenantor and the Department, collectively referred to herein as the "Parties," hereby agree that, pursuant to Civil Code section 1471 and Health and Safety Code section 25355.5, the use of the Property be restricted as set forth in this Covenant and that the Covenant shall conform with the requirements of California Code of Regulations, title 22, section 67391.1.

ARTICLE I  
STATEMENT OF FACTS

1.1. Property Location. The Property that is subject to this Covenant, totaling approximately 1.18 acres, is more particularly described and depicted in the attached Exhibit A, "Legal Description," and Exhibit B, "Plot Plan." The Property is located in the area now generally bounded by West Aten Road to the north, Liemgruber Street to the east, a vacant property to the south, and commercial/industrial property to the west. The Property is also identified as County of Imperial, Assessor's Parcel Number 044-220-045.

A limited portion of the Property is more particularly described in Exhibit "C," and referred to as the East Evaporation Pond ("East Pond Area"), which is located within a fenced area in the south-central portion of the Property.

1.2. Remediation of Property. This Property has been remediated under the Department's oversight pursuant to a Remedial Action Plan, dated January 1994, approved by the Department in accordance with Health and Safety Code, division 20, chapter 6.8. The remediation activities conducted by Caspian, Inc. at the Property included installation of a low permeability soils/Flexible Membrane Lined (FML) composite covering the East Pond Area (referred to herein as the "East Pond Cap"). An Operation and Maintenance Agreement, dated June 29, 1994, outlined the operation and maintenance obligations of Caspian, Inc. with respect to the Property.

1.3. Basis for Environmental Restrictions. Hazardous substances, which are also considered hazardous materials as defined in Health and Safety Code section 24260, remain at the Property above levels acceptable for unrestricted land use. As a result of the presence of soils containing high pH levels, soluble copper at 32.5 milligram per liter (mg/l), and soluble chromium at 5.2 mg/l at the Property, the Department has concluded that it is reasonably necessary to restrict the use of the Property in order to protect present or future human health or safety or the environment, and that this Covenant is required as part of the Department-approved remedy for the Property. The Department has also concluded that the Property, as remediated and when used in compliance with the Environmental Restrictions of this

Covenant, does not present an unacceptable risk to present and future human health or safety or the environment.

ARTICLE II  
DEFINITIONS

2.1. Department. "Department" means the California Department of Toxic Substances Control and includes its successor agencies, if any.

2.2. Environmental Restrictions. "Environmental Restrictions" means all protective provisions, covenants, restrictions, requirements, prohibitions, and terms and conditions as set forth in this Covenant.

2.3. Improvements. "Improvements" includes, but is not limited to, buildings, structures, roads, driveways, improved parking areas, wells, pipelines, or other utilities.

2.4. Lease. "Lease" means lease, rental agreement, or any other document that creates a right to use or occupy any portion of the Property.

2.5. Occupant. "Occupant" or "Occupants" means the Owner and any person or entity entitled by ownership, leasehold, or other legal relationship to the right to occupy any portion of the Property.

2.6. Owner. "Owner" or "Owners" means the Covenantor and any successor in interest, including heir and assign, who at any time holds title to all or any portion of the Property.

ARTICLE III  
GENERAL PROVISIONS

3.1. Runs with the Land. This Covenant sets forth Environmental Restrictions that apply to and encumber the Property and every portion thereof no matter how it is improved, held, used, occupied, leased, sold, hypothecated, encumbered, or conveyed. This Covenant: (a) runs with the land pursuant to Civil Code section 1471 and Health and Safety Code section 25355.5; (b) inures to the benefit of and passes with each and every portion of the Property; (c) is for the benefit of and is enforceable by the Department; and (d) is imposed upon the entire Property unless expressly stated as applicable only to a specific portion thereof.

3.2. Binding upon Owners/Occupants. This Covenant binds: (1) all Owners of the Property, their heirs, successors, and assignees; and (2) the agents, employees,

and lessees of the Owners and the Owners' heirs, successors, and assignees. Pursuant to Civil Code section 1471, all successive Owners of the Property are expressly bound hereby for the benefit of the Department. This Covenant, however, is binding on all Owners and Occupants, and their respective successors and assigns, only during their respective successive periods of ownership or occupancy except that such Owners or Occupants shall continue to be liable for any violations of the Environmental Restrictions of this Covenant or any acts or omissions during their ownership or occupancy.

3.3. Incorporation into Deeds and Leases. This Covenant shall be incorporated by reference in each and every deed and Lease for any portion of the Property.

3.4. Conveyance of Property. The Owner and new Owner shall provide Notice to the Department not later than 30 calendar days after any conveyance or receipt of any ownership interest in the Property (excluding Leases, and mortgages, liens, and other non-possessory encumbrances). The Notice shall include the name and mailing address of the new Owner of the Property and shall reference the site name and site code as listed on page one of this Covenant. The Notice shall also include the Assessor's Parcel Number(s) noted on page one. If the new Owner's property has been assigned a different Assessor's Parcel Number, each such Assessor's Parcel Number that covers the Property must be provided. The Department shall not, by reason of this Covenant, have authority to approve, disapprove, or otherwise affect proposed conveyance, except as otherwise provided by law or by administrative order.

3.5. Costs of Administering the Covenant to be paid by Owner. The Department has already incurred and will in the future incur costs associated with the administration of this Covenant. Therefore, the Covenantor hereby covenants for the Covenantor and for all subsequent Owners that, pursuant to California Code of Regulations, title 22, section 67391.1(h), the Owner agrees to pay the Department's costs in administering the Covenant.

#### ARTICLE IV

#### RESTRICTIONS AND REQUIREMENTS

4.1. Prohibited Uses. The Property shall not be used for any of the following

purposes:

- (a) A residence, including any mobile home or factory built housing, constructed or installed for use as residential human habitation.
- (b) A hospital for humans.
- (c) A public or private school for persons under 18 years of age.
- (d) A day care center for children.

4.2. Soil Management.

- (a) No activities that will disturb the soil (e.g., excavation, grading, removal, trenching, filling, earth movement, mining, or drilling) shall be allowed at the Property without a Soil Management Plan pre-approved by the Department in writing.
- (b) Any soil brought to the surface by grading, excavation, trenching or backfilling shall be managed in accordance with all applicable provisions of state and federal law.

4.3. Non-Interference with East Pond Area.

- (a) No activities that may alter, disturb, interfere with, or otherwise affect the integrity of, or the access to, the East Pond Cap and surrounding fence installed in the East Pond Area (e.g. excavation, grading, removal, trenching, filling, earth movement, or mining) shall be allowed at the Property without prior written approval by the Department.

4.5. Access for Department. The Department shall have reasonable right of entry and access to the Property for inspection, investigation, remediation, monitoring, and other activities as deemed necessary by the Department in order to protect the human health or safety or the environment.

4.6. Inspection and Reporting Requirements. The Owner shall conduct an annual inspection of the Property verifying compliance with this Covenant and shall submit an annual inspection report to the Department for its approval by December 15th of each year. The annual inspection report form is attached hereto as Exhibit D. The annual inspection report must include the dates, times, and names of those who conducted the inspection and reviewed the annual inspection report. It also shall describe how the observations that were the basis for the statements and conclusions

in the annual inspection report were performed (e.g., drive by, fly over, walk in, etc.). If any violation is noted, the annual inspection report must detail the steps taken to correct the violation and return to compliance. If the Owner identifies any violations of this Covenant, then the Owner must: (1) identify the violation in the annual inspection report if the violation was discovered during the annual inspection; or (2) notify the Department of the violation within 10 calendar days of discovery of the violation if the violation was discovered during any other time. If the violation of the Covenant was committed by a party other than the Owner, then the Owner must within 10 calendar days of identifying the violation: determine the identity of the party in violation; send a letter advising the party of the violation of the Covenant; and demand that the violation cease immediately. Additionally, a copy of any correspondence related to the violation of this Covenant shall be sent to the Department within 10 calendar days of its original transmission.

4.7 Five-Year Review. In addition to the annual inspection required by Paragraph 4.6, after a period of five (5) years from the recordation of this Covenant and every five (5) years thereafter, Owner shall review and reevaluate to evaluate the integrity and effectiveness of the East Pond Area, including the East Pond Cap and surrounding fence, to determine if human health and the environment are being adequately protected. Within 30 calendar days before the end of each five-year period, Owner shall submit a five-year review workplan to DTSC for review and approval. Within 60 calendar days of DTSC's approval of the workplan, Owner shall implement the workplan and submit a report of the results of the five-year review. The report shall describe the results of all inspections, sampling analyses, tests and other data generated or received by Owner and evaluate the adequacy of the implemented remedy in protecting human health and the environment. As a result of any review work performed, DTSC may require Owner to perform additional review work or modify the review work previously performed by Owner.

ARTICLE V  
ENFORCEMENT

5.1. Enforcement. Failure of the Owner or Occupant to comply with this Covenant shall be grounds for the Department to require modification or removal of any Improvements constructed or placed upon any portion of the Property in violation of this Covenant. Violation of this Covenant, including but not limited to, failure to submit (or the submission of any false statement), record, or report to the Department, shall be grounds for the Department to pursue administrative, civil, or criminal actions, as provided by law.

ARTICLE VI  
VARIANCE, REMOVAL AND TERM

6.1. Variance from Environmental Restrictions. Any person may apply to the Department for a written variance from any of the Environmental Restrictions imposed by this Covenant. Such application shall be made in accordance with Health and Safety Code section 25223.

6.2. Removal of Environmental Restrictions. Any person may apply to the Department to remove any of the Environmental Restrictions imposed by this Covenant or terminate the Covenant in its entirety. Such application shall be made in accordance with Health and Safety Code section 25224.

6.3. Term. Unless ended in accordance with paragraph 6.2, by law, or by the Department in the exercise of its discretion, this Covenant shall continue in effect in perpetuity.

ARTICLE VII  
MISCELLANEOUS

7.1. No Dedication Intended. Nothing set forth in this Covenant shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Property, or any portion thereof, to the general public or anyone else for any purpose whatsoever.

7.2. Recordation. The Covenantor shall record this Covenant, with all referenced Exhibits, in the County of Imperial within 10 calendar days of the Covenantor's receipt of a fully executed original.

7.3. Notices. Whenever any person gives or serves any Notice ("Notice" as used herein includes any demand or other communication with respect to this Covenant), each such Notice shall be in writing and shall be deemed effective: (a) when delivered, if personally delivered to the person being served or to an officer of a corporate party being served; or (b) three business days after deposit in the mail, if mailed by United States mail, postage paid, certified, return receipt requested. Any Notice required by this Covenant must be provided to the following persons:

To Owner: Daryl Dickerson, Owner  
Aten Properties, LLC  
839 Dogwood Road  
Heber, California 92249

Kathy Marquand, Office Manager  
Aten Properties, LLC  
839 Dogwood Road  
Heber, California 92249

And

To Department: Emad Yemut  
Brownfields and Environmental Restoration Program  
5796 Corporate Avenue  
Cypress, California 90630

Any party may change its address or the individual to whose attention a Notice is to be sent by giving advance Notice in compliance with this paragraph.

7.4. Partial Invalidity. If this Covenant or any of its terms are determined by a court of competent jurisdiction to be invalid for any reason, the surviving portions of this Covenant shall remain in full force and effect as if such portion found invalid had not been included herein.

7.5. Statutory References. All statutory or regulatory references include successor provisions.

7.6. Incorporation of Exhibits. All exhibits and attachments to this Covenant are incorporated herein by reference.

IN WITNESS WHEREOF, the Parties execute this Covenant.

SECOND FIVE-YEAR REVIEW: ATEN PROPERTIES SITE AT 287 W. ATEN ROAD,  
EL CENTRO, CALIFORNIA (SITE CODE: 401639)

Dear Mr. Embree:

The California Department of Toxic Substances Control (DTSC) has reviewed the above subject report, dated October, 2016 and prepared by Riverside Environmental Services, Inc.

DTSC concluded that the Second Five Year Review Report is adequate and has no comment. Therefore, the report is approved and the hardcopy will be put into file for DTSC record. Please see the additional recommendations from DTSC's Geologic Services Unit (GSU) attached.

If you have any questions or concerns, please call Mr. Malek Itani, Project Manager, at (714) 484-5324.

Sincerely,

Malek M. Itani, P.E.  
Environmental Scientist

**SUBJECT:** **SECOND FIVE-YEAR REVIEW, ATEN PROPERTIES SITE (APS) –  
FORMER CASPIAN INC. SITE**

Project: DTSC401639-00

Activity: 11018

### DOCUMENTS REVIEWED

*Second Five-Year Review, Aten Properties Site (APS) – Former Caspian Inc. Site prepared by Riverside Environmental Services, Inc. and dated October 2016 (Document).*

### INTRODUCTION

The GSU reviewed the Document and conducted a site visit on January 25, 2017. A discussion of the review of the Document, previous reports and letters, and the current status of the APS are presented in this memorandum.

The APS is located at 287 W. Aten Road, El Centro, California and, according to the Document, covers approximately 10 acres with approximately 1.18 acres being the area of environmental remediation and subsequent deed restrictions. According to USEPA, the purpose of a Five-Year Review (FYR) is to evaluate the implementation and performance of a remedy in order to determine if the remedy is and will continue to be protective of human health and the environment.

The GSU concurs with the Document that the ongoing implementation of the remedy is in accordance with the June 26, 1994 Operation and Maintenance (O&M) Agreement and June 29, 1998 letter issued by DTSC concurring with the proposed termination the groundwater monitoring portion of the O&M agreement.

Consistent with the purposes of the FYR, the Document states "*The remedy at APS is protective of human health and the environment.*" The GSU further evaluated this statement and the performance aspect of a remedy in the FYR, considering the remedial action objectives (RAOs) for the site, as stated in the DTSC-approved Feasibility Study/ Remedial Action Plan (FS/RAP) revised January 12, 1994 (Dudek & Associates, Inc, 1994) and the general history of the site. The RAOs for the APS are:

- The RAO for the east evaporation pond, where the cover was placed, is to prevent dermal contact, ingestion, or inhalation of elevated pH sediment containing concentrations of lead or hexavalent chromium greater than concentrations which create a health hazard of carcinogenic risk for a resident living in the east evaporation pond for 70 years and prevent the off-site migration of these sediments. The upper limit of the 90 percent confidence interval for the soluble copper concentrations was less than the STLC for copper. The upper limit of the 90 percent confidence interval for soluble chromium was less than the STLC for chromium.
- The RAO for the chemical milling area sump was to prevent soil containing nickel and/or chromium at concentrations exceeding the STLC for nickel and/or chromium from coming into contact with people and biota, or migrating off site.
- "*No RAOs were developed for the soil and groundwater in the vicinity of the building area sump. Analytical results of soil and groundwater in the vicinity of the building area sump do not reveal a source of VOCs present beneath the building area sump. VOCs in the soil and groundwater in the vicinity of the building area sump are not present at concentrations great enough to pose a health risk to excavation/construction workers, or exceeding ARAR action limits. Ingestion of groundwater is not considered a possible exposure route because the TDS concentrations in the groundwater precludes the use of groundwater as a drinking water.*" (Dudek & Associates, Inc, 1994)

The following is the general chronology of the site.

**1973 – 1977**

Site was used as a copper-coated steel wire production facility (Ameron, Inc.), which involved chemical processes that used chemical solutions such as sulfuric acid, hydrofluoric acid, calcium hydroxide and borax.

**1979**

Caspian, Inc, (successor in interest to Taravat Inc.) purchased the Site for the manufacture of aerospace component parts. Caspian, Inc. used a chemical process that involved controlled dissolution of metal in a solution of hydrochloric, nitric, and hydrofluoric acid, after which the metal was removed and rinsed with water.

<b>May 18, 1981</b>	Caspian Incorporated (aka Taravat Corporation) filed for Part A application for two surface impoundments
<b>November 10, 1981</b>	DHS issued ISD to facility.
<b>November 1, 1984</b>	DHS inspection of the facility found numerous violations.
<b>1984</b>	Caspian ceased milling operations at the Site.
<b>1986</b>	Caspian removed contaminated concrete pads and soils under the oversight of the Regional Water Quality Control Board. Subsequent testing results indicated a need for further site remediation.
<b>1986 – 1988</b>	Additional inspections found continued violations.
<b>May 18, 1989</b>	Caspian entered into a Consent Order with Decree with the DTSC. Site Mitigation group was responsible for the site cleanup. NOTE: Caspian consistently maintained that it did not utilize any of the surface impoundment in connection with its operations at the Site. Caspian entered into California Consent Order No. 890904K(IEG), in which Caspian assumed responsibility for remediation of the Site based on its liability under CERCLA and HSAA as an owner of the Site. No other entity is named in the Consent Order as a responsible party. Consequently, Caspian is the only entity that had been identified as a responsible party
<b>August 30, 1990</b>	Public Participation Plan/ Community Relations Plan submitted.
<b>September 9, 1991</b>	Risk Assessment submitted
<b>May 6, 1992</b>	Final Version of Revised Remedial Investigation Report accepted.
<b>December 1993</b>	DTSC approved a Feasibility Study Report which identified, evaluated and screened Site clean-up alternatives. A Remedial Action Plan (RAP) which identified the selected clean-up alternatives was public noticed and a public meeting was held. DTSC approved the RAP on December 29, 1993.
<b>January 1994</b>	Final Feasibility Study/Remedial Action Plan submitted January 1994. Document states " <i>Operation and maintenance requirements for the closed areas will consist of two specific activities: groundwater monitoring, and site physical inspections. Ground water monitoring will occur on a semi-annual basis to ensure that the remediation has achieved the objective of not allowing migration of contamination into the groundwater. The existing monitoring wells will be used for this purpose. <u>Semi-annual groundwater monitoring will occur for a period of five years</u> (emphasis added) at which time the necessity and frequency of monitoring will be reviewed. The other ongoing requirement will be routine visual inspections of the site fencing and the final cover for signs of deterioration or erosion.</i> " Activities

conducted April 19, 1994 through June 2, 1994 in accordance with an approved Remedial Action Workplan. The remediation involved construction of a soil/flexible membrane layer composite layer over the east evaporation pond; and excavation and disposal of approximately 8.8 tons of contaminated soil from the Chemical Milling area to a Class I landfill.

---

<b>June 29, 1994</b>	A deed restriction of the facility was signed. An Operation and Maintenance (O&M) Agreement was signed on June 29, 1994. The O&M agreement states " <u>Respondent shall perform groundwater monitoring for five (5) years and report the results of such monitoring to the Department on a semi-annual basis for five (5) years.</u> " ( <i>emphasis added</i> )
<b>June 30, 1994</b>	The Site was certified with a Land Use Covenant for further monitoring of the East Pond Cap.
<b>November 14, 1994</b>	A Remediation Completion letter dated 11/14/94 addressed to County of Imperial is in the file.
<b>1994 – 1996</b>	Monitoring Wells MW-1, MW-2, MW-3, MW-4, and MW-5 were sampled on 6/6/94, 12/02/94, 6/6/95, and 11/28/95. MW-3 was also sampled on 12/3/96. Wells were sampled for total chromium, copper, nickel, lead, and for volatile organic compounds (VOCs). MW-3 contained VOC concentrations of 1,1-DCA, 1,1-DCE, and PCE at concentration above MCLs in each event except 12/3/96 event. For 1,2-DCA, the concentrations during the five sampling events were 26, 41, 42, 22, and 6 ug/L, respectively. NOTE: Three sampling events were conducted in the five wells prior to signing the O&M agreement: 11/8/90, 12/10/90, and 6/5/91. Results were the same with the exception of higher concentrations of 1,1-DCA (80, ND, and 86 ug/L, respectively), and 1,1-DCE (11, 3, and 15 ug/L) in MW-3. In the last monitoring report, dated January 9, 1997, Flour Daniel GTI stated "Concentrations of 1,1-DCA in well MW-3 have generally decreased since routine groundwater sampling began in 1990 indicating natural attenuation of this constituent with time" and recommended the cessation of groundwater monitoring." Based on the of correspondence from Caspian, they viewed the required five-years of monitoring to included sampling that began in November 8, 1990
<b>June 29, 1998</b>	DTSC issues letter concurring with Flour Daniel GTI's recommendations that no further action (i.e., groundwater monitoring and sampling) is necessary for groundwater at the Site.
<b>2012</b>	Around or before 2012, Aten Properties, LLC purchased the property and are the current owners. A new LUC covenant was recorded on April 23, 2014.

---

## **DISCUSSION**

The RAO for the chemical milling area sump was met through excavation and removal. There is no RAO for groundwater, therefore, ongoing or future groundwater monitoring is not required.

The RAO for the cover at the east evaporation pond is to prevent dermal contact, ingestion, or inhalation of elevated pH sediment containing concentrations of lead or hexavalent chromium and is the portion of the site remedy remaining and subject to the FYR and the LUC.

Given the information available and presented in the Document, the GSU recommends approval of the Document and further recommends that the five (5) monitoring wells, which are no longer required, at the site be abandoned in accordance with state and local regulations and requirements.

Further, Aten Properties LLC (Aten), may want to modify the regulatory status of the site and/or LUC. Aten may re-evaluate the current remedy for the east evaporation pond that may result in unrestricted land use or a modification in the LUC.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Lead Paint \_\_\_\_\_

Radon \_\_\_\_\_

## ASTM STANDARD INFORMATION

As a requirement under the current ASTM Phase I Environmental Site Assessment (ESA) Standard, please answer these questions, to the best of your knowledge:

1. **Environmental liens that are filed or recorded against the *subject property*.** Are you aware of any environmental liens recorded against the property? Did a search of *recorded land title records* (or judicial records where appropriate) identify any environmental liens filed or recorded against the *subject property* under federal, tribal, state, or local law?

I am not aware of any Environmental liens that are filed or recorded against the subject property

2. **Activity and use limitations that are in place on the *subject property* or that have been filed or recorded against the *subject property*.** Are you aware of any activity use limitations (AUL) recorded against the *subject property*? Did a search of *recorded land title records* (or judicial records where appropriate) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the property and/or have been filed or recorded against the *subject property* under federal, tribal, state or local law?

I am not aware of any activity use limitations (AUL) recorded against the subject property.

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP.** Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

I do not have any specialized knowledge or experience related to the property as the current or former occupants of the property or an adjoining property.

4. **Relationship of the purchase price to the fair market value of the *subject property* if it were not contaminated.** Does the purchase price being paid for this *subject property* reasonable reflect the fair market value of the *subject property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *subject property*?

the purchase price being paid for this subject property reasonable reflect the fair market value of the subject property.

5. **Commonly known or *reasonably ascertainable* information about the *subject property*.** Are you aware of commonly known or *reasonably ascertainable* information about the *subject property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,

- a. Do you know the past uses of the *subject property*?

No

- b. Do you know of specific chemicals or oils that are present or once were present at the *subject property*?

No

- c. Do you know of spills or other chemical releases that have taken place at the *subject property*?

No

- d. Do you know of any environmental cleanups that have taken place at the *subject property*?

no

6. **The degree of obviousness of the presence or likely presence of contamination at the *subject property*, and the ability to detect the contamination by appropriate investigation.** Are you aware of any pending, past or threatened litigation related to hazardous substances or petroleum products releases at the property? Based on your knowledge and experience related to the *subject property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *subject property*?

There is no pending, past or threatened litigation related to hazardous substances or petroleum products relBase on my knowledge and experience related to the subject property are there no indicators that point to the presence or likely presence of releases at the subject property. Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of releases at the subject property. Base on my knowledge and experience related to the subject property, there are no indicators that point to the presence or likely presence of releases at the subject property.

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel number and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and the most current publicly available date
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

### Interspousal Transfer Deed

#### Title of Document

Commencing January 1, 2018, and except as provided in paragraph (2) GC 27388.1, in addition to any other recording fees specified in this code, a fee of seventy-five dollars (\$75) shall be paid at the time of recording of every real estate instrument, paper, or notice required or permitted by law to be recorded, except those expressly exempted from payment of recording fees, per each single transaction per parcel of real property. The fee imposed by this section shall not exceed two hundred twenty-five dollars (\$225). "Real estate instrument, paper, or notice" means a document relating to real property, including, but not limited to, the following: deed, grant deed, trustee's deed, deed of trust, reconveyance, quit claim deed, fictitious deed of trust, assignment of deed of trust, request for notice of default, abstract of judgment, subordination agreement, declaration of homestead, abandonment of homestead, notice of default, release or discharge, easement, notice of trustee sale, notice of completion, UCC financing statement, mechanic's lien, maps, and covenants, conditions, and restrictions. Pursuant to GC section 27388.1 (2) the fee described in paragraph (1) shall not be imposed on any of the following documents:

Reason for Exemption:

- Any real estate instrument, paper, or notice recorded in connection with a transfer subject to the imposition of a documentary transfer tax as defined in Section 11911 of the Revenue and Taxation Code.
- Any real estate instrument, paper, or notice recorded in connection with a transfer of real property that is a residential dwelling to an owner-occupier.
- Any real estate instrument, paper, or notice executed or recorded by the federal government in accordance with the Uniform Federal Lien Registration Act (Title 7(commencing with Section 2100) of Part 4 of the Code of Civil Procedure).
- Any real estate instrument, paper, or notice executed or recorded by the state or any county, municipality, or other political subdivision of the state.
- Exempt from fee per GC 27388.1 (a) (1); fee cap of \$225.00 reached.
- Exempt from fee per GC 27388.1 (a) (1); not related to real property.

I hereby declare under penalty of perjury that the information provided above is true and correct.

### INTERSPOUSAL TRANSFER DEED

(Excluded from reappraisal under California Constitution Article 13 A Section 1 et seq.)

The undersigned grantor(s) declare(s)

This transfer is exempt from the documentary transfer tax.

This conveyance **ESTABLISHES SOLE AND SEPARATE PROPERTY OF A  
SPOUSE, R & T 11911.**

The documentary transfer tax is \$ \_\_\_\_\_ and is computed on:

the full value of the interest or property conveyed.

the full value less the liens or encumbrances remaining thereon at the time of sale.

The property is located in  **the City of Imperial, AN UNINCORPORATED AREA**

This is an Interspousal Transfer and not a change in ownership under Section 63 of the Revenue and Taxation Code and Grantor(s) has (have) checked the applicable exclusion from reappraisal:

- A creation, transfer, or termination, solely between spouses, of any co-owner's interest.

**FOR A VALUABLE CONSIDERATION, receipt of which is hereby acknowledged,**

Bertha Luisa Barriga, Spouse of Grantee

hereby **GRANT(S)** to

Jesus Barriga, a married man as his sole and separate property

**the real property in the ~~City of Imperial~~, County of Imperial, State of California:**

SEE EXHIBIT "A" ATTACHED HERETO AND MADE A PART HEREOF

The grantor is executing this instrument for the purpose of relinquishing all of grantor's rights, title and interest, including, but not limited to, any community property interest in and to the land described herein and placing title in the name of the grantee as his/her separate property.

1. **Max Leimgruber**, the decedent mentioned in the attached certified copy of Certificate of Death, is the same person as **Max Leimgruber**, named as Trustee in the Declaration of Trust dated 10-13-2014 and executed by **Max Leimgruber**, as Trustor(s).
2. At the time of the decedent's death, decedent was the record owner, as Trustee, of certain real property commonly known as (address) 798 Vencill Rd., Holtville, CA 92250, which property is described in a Deed(s) which was executed by **Max Leimgruber** as Grantor(s) on 10-13-2014 and recorded on 02-05-2015 as Instrument No. 2015002145; 2015002143; 2015002144; 2015002146; 2015002147 of Official Records of Imperial County, California.
3. The legal description of said property is as follows: **See Attachment 1**
4. I am the named successor Trustee under the above-referenced Trust, which was in effect at the time of the death of the decedent mentioned in Paragraph 1, above, and which has not been revoked, and I hereby consent to act as such.
5. There is no federal estate tax as the result of the death of the decedent mentioned in Paragraph 1, above.

I declare under penalty of perjury, under the laws of the State of California, that the foregoing is true and correct.

Dated: 11/15/24

Kennecott Corporation

**Summary of Experience**

Mr. Williams has 27 years of experience in performing Phase I Environmental Site Assessments throughout the Imperial and Coachella Valleys. The scope of work for these projects typically include a site reconnaissance, review of historical and government records pertaining to previous site uses, and preparation of a report identifying potential environmental risks.

Mr. Williams has also conducted Phase II Environmental Site Assessments for the evaluation of potential soil contamination by hydrocarbons, pesticides, and other hazardous materials. Mr. Williams has also conducted Preliminary Endangerment Assessments (PEAs) for school sites within the Imperial and Coachella Valleys.
